## Handbook of Statistical Modeling for the Social and Behavioral Sciences

Contributors thoroughly survey the most important statistical models used in empirical research in the social and behavioral sciences. Following a common format, each chapter introduces a model, illustrates the types of problems and data for which the model is best used, provides numerous examples that draw upon familiar models or procedures, and includes material on software that can be used to estimate the models studied.

This handbook will aid researchers, methodologists, graduate students, and statisticians to understand and resolve common modeling problems.
