## Audiovisual Translation and Media Accessibility at the Crossroads: Media for All 3 (Approaches to Translation Studies)

This third volume in the Media for All series offers a diverse selection of articles which bear testimony to the vigour and versatility of research and developments in audiovisual translation and media accessibility. The collection reflects the critical impact of new technologies on AVT, media accessibility and consumer behaviour and shows the significant increase in collaborative and interdisciplinary research targeting changing consumer perceptions as well as quality issues. Complementing newcomers such as crowdsourcing and potentially universal emoticons, classical themes of AVT studies such as linguistic analyses and corpus-based research are featured. Prevalent throughout the volume is the impact of technology on both methodologies and content. The book will be of interest to researchers from a wide range of disciplines as well as audiovisual translators, lecturers, trainers and students, producers and developers working in the field of language and media accessibility.
