## **Transfigurations of the European Identity** Bulcsu Bognar

European identity is as much a problem as an opportunity. Although it is impossible to provide an all-encompassing definition of what it means to be European, historicising and contextualising this problem may well lead to the clarification and even creation of a European identity. This is the contention of this volume, which approaches this complex notion from an inter- and transdisciplinary perspective, examining facets ranging from the citizen to cultural politics, from literature to traditional and digital media, from the US to China. As complex as this idea is, this volume will extend the reader's understanding of the timely and promising problematisation of what may be termed "European identity."
