Principles Of Research Design And Drug Literature Evaluation

Rajender R. Aparasu, John P. Bentley

Principles Of Research Design And Drug Literature Evaluation Rajender R. Aparasu, John P. Bentley
Principles of Research Design and Drug Literature Evaluation is a unique resource that provides a balanced approach covering critical elements of clinical research, biostatistical principles, and scientific literature evaluation techniques for evidence-based medicine. This accessible text provides comprehensive course content that meets and exceeds the curriculum standards set by the Accreditation Council for Pharmacy Education (ACPE). Written by expert authors specializing in pharmacy practice and research, this valuable text will provide pharmacy students and practitioners with a thorough understanding of the principles and practices of drug literature evaluation with a strong grounding in research and biostatistical principles. Principles of Research Design and Drug Literature Evaluation is an ideal foundation for professional pharmacy students and a key resource for pharmacy residents, research fellows, practitioners, and clinical researchers. FEATURES * Chapter Pedagogy: Learning Objectives, Review Questions, References, and Online Resources * Instructor Resources: PowerPoint Presentations, Test Bank, and an Answer Key * Student Resources: a Navigate Companion Website, including Crossword Puzzles, Interactive Flash Cards, Interactive Glossary, Matching Questions, and Web Links From the Foreword: "This book was designed to provide and encourage practitioner's development and use of critical drug information evaluation skills through a deeper understanding of the foundational principles of study design and statistical methods. Because guidance on how a study's limited findings should not be used is rare, practitioners must understand and evaluate for themselves the veracity and implications of the inherently limited primary literature findings they use as sources of drug information to make evidence-based decisions together with their patients. The editors organized the book into three supporting sections to meet their pedagogical goals and address practitioners' needs in translating research into practice. Thanks to the editors, authors, and content of this book, you can now be more prepared than ever before for translating research into practice." L. Douglas Ried, PhD, FAPhA Editor-in-Chief Emeritus, Journal of the American Pharmacists Association Professor and Associate Dean for Academic Affairs, College of Pharmacy, University of Texas at Tyler, Tyler, Texas

From reader reviews:

Christine Curnutt:

This Principles Of Research Design And Drug Literature Evaluation book is simply not ordinary book, you have after that it the world is in your hands. The benefit you obtain by reading this book will be information inside this e-book incredible fresh, you will get details which is getting deeper you actually read a lot of information you will get. This particular Principles Of Research Design And Drug Literature Evaluation without we realize teach the one who looking at it become critical in considering and analyzing. Don't be worry Principles Of Research Design And Drug Literature Evaluation can bring any time you are and not make your handbag space or bookshelves' come to be full because you can have it in the lovely laptop even cellphone. This Principles Of Research Design And Drug Literature Evaluation having very good arrangement in word and also layout, so you will not really feel uninterested in reading.

Guillermo Behler:

Nowadays reading books become more than want or need but also get a life style. This reading addiction give you lot of advantages. The benefits you got of course the knowledge the particular information inside the book in which improve your knowledge and information. The details you get based on what kind of publication you read, if you want attract knowledge just go with education and learning books but if you want sense happy read one together with theme for entertaining like comic or novel. The particular Principles Of Research Design And Drug Literature Evaluation is kind of guide which is giving the reader unforeseen experience.

Joan Marcial:

Reading a book can be one of a lot of exercise that everyone in the world loves. Do you like reading book and so. There are a lot of reasons why people love it. First reading a reserve will give you a lot of new data. When you read a reserve you will get new information simply because book is one of several ways to share the information or even their idea. Second, studying a book will make an individual more imaginative. When you studying a book especially fictional works book the author will bring that you imagine the story how the characters do it anything. Third, you are able to share your knowledge to other individuals. When you read this Principles Of Research Design And Drug Literature Evaluation, you can tells your family, friends and soon about yours guide. Your knowledge can inspire different ones, make them reading a reserve.

Carl Brinkley:

Many people spending their time period by playing outside with friends, fun activity using family or just watching TV all day every day. You can have new activity to shell out your whole day by examining a book. Ugh, do you consider reading a book really can hard because you have to accept the book everywhere? It all right you can have the e-book, taking everywhere you want in your Touch screen phone. Like Principles Of Research Design And Drug Literature Evaluation which is finding the e-book version. So , why not try out

this book? Let's observe.
