F. S. Brightbill

Corneal Surgery: Theory, Technique, and Tissue F. S. Brightbill

Provides comprehensive coverage of the entire scope of corneal surgery, including corneal transplantation (penetrating keratoplasty), refractive keratoplasty techniques, developments in corneal research, and all aspects of eye banking. Corneal transplantation is discussed from the interaction with an eye bank and donor materials through the surgical procedures to the management of complications and long term results. Also discussed are tissue typing and immunologic concern, post surgical care, and contact lens fitting. A separate section is devoted to special situations in keroplasty, including chemical burns, herpes simplex, re-grafting and paediatric grafting. Features include: comprehensive, state-of-the-art coverage of all aspects of corneal surgery, research and eye banking; the latest kerato-refractive surgical procedures; the most current information and techniques in penetrative keratoplasty; addresses special situations in keratoplasty, such as chemical burns, herpes simplex, re-grafting and paediatric grafting; text discussion with over 800 line drawings, clinical photographs, and micrographs - over 200 in full colour; and coverage of both the medical and administrative aspects in eye banking.
